

BALLOON BOOK

riethmüller
make life a party

2026

Our Vision is
to set the global stage on fire,
transforming the party industry into a realm
of boundless excitement and inspiration.

We aim to lead with unparalleled innovation,
selling not just products,
but the vibrant emotions they spark.

Our Mission is clear:

to make life a party

FOLIO BALLONS

BALLOON INFLATION GUIDE

Helium makes balloons float. It's a non-toxic inert gas and is perfectly safe when used correctly.

- 1 Latex Nozzle
- 2 Tank Cylinder Valve (on/off)
- 3 Regulator Connector
- 4 Foil Nozzle

Foil Nozzle

Use to inflate all foil balloons except Orbz™ balloons.

Latex Nozzle

Use with caution! Use to inflate Orbz™ balloons. Should NOT be used with foil balloons.

Incorrect Nozzle

DO NOT use with foil balloons!

Insert the foil nozzle carefully into the valve opening.

Always hold the balloon straight when inflating. If the valve is bent, it might become damaged.

Inflate balloon slowly and let air fill smaller parts before inflating body completely. Otherwise, the body may overinflate and damage the balloon.

Orbz™ inflation

For proper Orbz™ inflation instructions using the Latex Nozzle, scan this code.

Inflate balloon should yield slightly when you push on them. If the balloon is not flexible anymore, it is overinflated.

RIBBON ATTACHMENT

It is your responsibility to make sure that helium-filled balloons do not escape and float away. Before inflating a foil balloon, you must attach a ribbon and weight (or attach a ribbon and secure it to a fixed object). This helps to ensure that the balloon can be retrieved if it is accidentally released.

Tie the balloon at the "Tie Ribbon Here" line using a regular knot or the method described below.

Do not tie the balloon above the "Tie Ribbon Here" line. This may damage the valve and helium will escape faster.

Tie a loop with your finger.

Fold the neck of the balloon once & place the loop over it.

Fold the neck of the balloon over the loop again and pull down firmly.

Tape attachment

You can also tape the ribbon to the back of the tail, opposite the punch hole. Use a heavy-duty clear adhesive tape. Household adhesive tape may not securely adhere.

WEIGHT ATTACHMENT

If you're not sure which weight to use, attach an 8-gram weight to the balloon and then inflate it. Let go of the balloon for a split second to see if the weight holds it down. If not, try a heavier weight designed for larger balloons or bouquets.

Balloon Category	Appropriate Weight
Standards, Junior Shapes	8 grms
Orbz™, UktraShapes™, SuperShapes™	25-50 grams
Jumbos	40-60 grams

STICK & CUP FORMAT

Small treats for big smiles!

Our airfilled, pre-inflated MiniShape balloons on a **paper** stick are available in two versions:

With the 1 cm (Ø) paper balloon stick (item number ending with -3 or -66)

With our new 0,5 cm (Ø) paper balloon stick (item number ending with -67)

All MiniShapes are also available in a bulk version. These are unfilled and come without the sticks, which are available separately.

About your films

Anagram's line of high-quality balloons with 20% Helium Savings per balloon!

Balloons made with Anagram's XtraLife technology stay fuller and look fresher longer!

Anagram's XL™ Foil Balloons retain helium 3-5 times longer than non-XL™ foil balloons!

HOLOGRAPHIC

Produces beautiful, eye-catching dazzle with twinkling patterns and color-enhancing effects!

SEE-THRU™

Anagram's clear, non-conductive film provides an exciting alternative to classic foil balloons.

GENERAL
BIRTHDAY

SINGING

ADULT

Singing Balloons for a fun surprise!

Much more than just a Happy Birthday foil balloon. From an elegant black design to a lovely pink version, our collection also includes child-friendly models with appealing animal motifs and popular themes such as adventurous pirates and magical unicorns.

We guarantee there's something for everyone. Our singing balloons are more than just ordinary party decorations. They add a lively and interactive touch to parties with recorded audio by playing the cheerful Happy Birthday song. These balloons will add entertainment and joy to any celebration. The music can be played up to 50 times.

(Non replacable battery included)

GENERAL BIRTHDAY

CRYSTAL CLEARZ

Anagram's Crystal Clearz™ are exactly that:
 Clear, globe-shaped poly balloons available in clear and three other colours.
 Crystal Clearz™ are pre-stretched with a self-sealing valve and
 are easy to inflate to 18-22" (45-55 cm) across using a latex regulator.

Use
 Hi-Float
 To extend
 floating time

These
 balloons
 contain
 no latex

Float time
 approximately
 24-48
 hours

LATEX BALLOONS

ABOUT LATEX BALLOONS

First... a few notes about latex balloons

Latex balloons are made from 100 percent pure and natural latex. Latex is a substance harvested from the bark of a rubber tree, so you will sometimes hear it called “latex rubber.”

Because it is a natural substance, latex breaks down relatively quickly under normal environmental conditions. Latex balloons are completely photo- and biodegradable.

INFLATING A LATEX BALLOON

Latex balloons are most often used as a complement to Anagram foil balloons in a decorator arrangement or a balloon bunch. Depending on how a latex balloon is to be used, it can be filled with either air or helium.

A properly inflated latex balloon is neither round nor pear shaped. A round balloon is considered under-inflated. One that is pear shaped (bulging out at the bottom) is considered over-inflated. Over- or under-inflating a latex balloon will reduce its float time, so it is important to inflate your latex balloons properly, as shown below. Here are a few other things that you should know about the proper inflation of latex balloons.

- Due to the difference in properties between air and helium, an air-filled latex balloon will last much longer than a helium-filled one. When filled with helium, an 11-inch latex balloon will usually float for 16 to 18 hours. However, filled with air the same size balloon will remain inflated for many weeks.
- Latex balloons to be inflated to less than 9 inches in diameter should be filled with air. If filled with helium, they will float for only a very short time.
- Temperature changes cause the helium inside a balloon to expand or contract. Latex balloons are designed to expand well beyond their listed size. This allows them to adjust to dramatic temperature changes as long as they are inflated to the correct size in the first place.
- Latex balloons float longer in cool conditions and shorter in warm conditions.
- The higher the altitude, the shorter the float time will be for a latex balloon.

• Eventually, all latex balloons experience oxidation, which appears as a cloudy or dusty coating on latex balloons. Oxidation is caused by ultraviolet rays that attack the latex and begin to break it down.

This process cannot realistically be prevented or stopped, but it can be delayed. A latex balloon in cool, dry conditions oxidizes more slowly than one in warm, bright and humid conditions. You should be sure to make your customers aware of this.

TYING A LATEX BALLOON

By tying a latex balloon, rather than using plastic discs or plugs, you will not only save time and money, but you will also achieve a better looking result. The following instructions will show you how to tie a latex balloon quickly, easily and efficiently:

Tying the balloon in this manner has several benefits:

1. Once you've perfected the technique, you'll find that it's faster than other methods.
2. Your balloons will look much more attractive without a plastic disk.
3. You'll reduce your costs by dispensing with disks.
4. You'll improve the float of your balloons by eliminating the weight of the disk.
5. You can pull the loose ribbon end to adjust the height of your balloons in an arrangement with ease. You don't have to remove them to shorten the ribbon.

NOTE:

Do not use this technique for balloons that will be taken outside. Wind can pull the balloon off of the ribbon.

If a balloon is to be taken outside, follow the instructions below, then tie the loose ribbon end around the neck of the balloon to secure it and attach the balloon to a weight so as not to have it fly away.

1

Cut a piece of ribbon to the desired length, plus a few additional inches for tying. Lay the ribbon across your left palm (or your right, if you're left-handed) as shown.

2

Place the neck of an inflated balloon across the ribbon (the neck should be pointing upward). Place your thumb over both and hold securely in place.

3

With your free hand, stretch the neck all the way around the index and middle fingers of your ribbon hand, ending in front.

4

Tuck the neck of the balloon through the circle, along with the end of the ribbon. This will complete the knot. Remove your fingers from the knot and curl the ribbon tail.

ALL-ROUND CAREFREE PACKAGE FUNCTIONALITY - MADE IN GERMANY

THE ALL-IN-ONE POS SOLUTION

Reliable earnings with minimal effort – emotional product presentation.

SAFE

The helium bottle is locked and fixed safely within the display. Set up, training & support by our qualified staff.

EASY

Balloons can be filled easily with the automatic stop valve.

FLEXIBLE

Mobile product presentation is possible due to integrated wheels. Easy to handle & space-saving display solution.

INNOVATIVE

Balloons are fixed with a Clip-N-Spool weight to prevent them floating away.

Develop additional sales potential

Attractive earnings per unit high level of space productivity

Uniqueness and differentiation in the trade sector

No need of dedicated sales staff

Attractive pocket money price range

Immediately ready for sale (balloon + helium + weight)
